

WHAT IS BIOTIME®?

BIOTIME is truly a unique nutrition supplement for the hoof and coat. Since poor quality hooves and rough, dry hair coats can result from several nutrient deficiencies and/or the diminished ability to metabolize these nutrients, BIOTIME takes a multi-nutrient approach toward the prevention of these conditions.

BIOTIME'S wide range of nutrients are supplied in a very palatable oatmeal and molasses-based pellet which can easily be top dressed over your horse's feed or fed alone. The small scoop enclosed in each package of BIOTIME holds approximately a 1 oz feeding which is recommended for horses with poor quality hooves and/or dry, rough hair coats. While positive results have been reported much earlier, several weeks or even months of supplementation may be necessary before the full benefits of BIOTIME can be seen.

FEEDING INSTRUCTIONS

Feed 1 oz per day per 1000 lb body weight. Up to 2 oz per day per 1000 lb body weight may be beneficial for horses with extremely bad hooves. For the sake of balanced nutrition, please check with your nutritionist or veterinarian before feeding more than 2 oz per day.

INGREDIENTS

Feeding oatmeal, yeast culture, dried yeast (*Saccharomyces cerevisiae*) fermentation solubles, cane molasses, D,L-methionine, zinc methionine, d-biotin, (sorbic acid, propionic acid and ethoxyquin as preservatives).

GUARANTEED ANALYSIS

d-biotin (min.).....	320 mg/lb (20 mg/ounce)
D,L-methionine (min.)	10.6 % (3000 mg/ounce)
zinc (min.).....	2470 ppm (70 mg/ounce)

Available in 5 lb. (2.3 kg), 10 lb. (4.5 kg), and 25 lb. (11.4 kg) pails.

*Product availability varies by location.
