Each horse is unique and should be fed to maintain desired body condition. The following amounts are guidelines only and may be adjusted slightly to meet the needs of your horses. Split the recommended level below into 2 or more feedings each day. Avoid feeding levels that produce excess body condition. Regular body condition evaluation is suggested.

Feed good, clean hay at the rate of 1 to 1.75 LB per 100 LB bodyweight daily.

Salt and mineral may be offered free-choice.

Provide plenty of fresh, clean water at all times except to hot, tired horses.

NOTE: Important to feed hay with this ration as per directions.

**CAUTION:** Store feed in a clean, cool and dry location. Storage area should be free of insects and rodents. Do not allow animals access to feedstuffs that show signs of insect or rodent infestation. Do not allow animals access to hot or moldy feedstuffs at any time.
