

Keyflow® Key-Plus®

Pre-digested Stabilized Rice Bran Supplement

Perfect for:

- Safely building condition
- Providing cool calories for stressy or nervy types
- Superb muscle and topline development
- Effective supplementation during yearling preparation
- Improving overall condition for hard keepers or poor doers
- Confidently feed to horses and ponies prone to gastric ulcers
- Supporting condition in horses with allergies, gluten intolerance or digestive sensitivity

Key Points:

- Ideal for safely topping up your horse or pony's condition
- Completely non-heating and a fantastic source of slow release energy
- Cereal grain free and gluten free, making it very sympathetic and easy to digest
- Economic to feed from a concentrated formulation and low feeding rates
- Fully steam extruded and highly digestible
- Quality antioxidants from natural sources
- High in oil and exceptionally low starch
- Stabilized rice bran is hypoallergenic, making it safe for horses susceptible to allergies

Low Sugar & Starch

Non-Heating

Cereal Free

Fully Steam Extruded

Hypoallergenic

Boosted Antioxidants

High Oil

Gluten Free

Condition
4.5

Product Summary

Keyflow® Key-Plus® is a safe and effective, non-heating, concentrated conditioning supplement for horses and ponies, especially suitable for stressy, nervy types, or those prone to digestive disturbances. Wet steam extrusion, an advanced feed technology, greatly improves digestibility and nutrient absorption in the small intestine. Combined with a high oil content, Key-Plus® builds an unmatched quality of condition and supports superior muscle and topline development. Low starch and cereal grain free, Key-Plus® is a reliable option for sharp, excitable horses and even those with the most erratic behaviour. Rice bran is naturally high in antioxidants, additional organic selenium and vitamin E is included to boost antioxidant support. Key-Plus® has a balanced calcium to phosphorous ratio, it is recommended to feed with Keyflows class leading range of pre-digested balancers and complete feeds, to top-up and support condition when required.

Ingredients

Steam extruded stabilized rice bran concentrate, rice bran oil, mineral salts, and heat stable vitamins.
