

FOAL & WEANLING™

Pelleted Feed for Young Foals

FEATURES:

- High nutrient concentrations to meet the needs of the very young, rapidly growing horse
- Formulated to promote proper gut development and function
- Highly palatable
- Contains natural source of gamma-oryzanols
- Available in ½ inch diameter pellets designed for easy chewing and absorption

FUNCTIONS:

- Provides properly balanced transition from mare's milk to regular feed
- Additional nutritional support for suckling foals
- Extra nutritional boost for the young growing horse
- Ideal creep feed
- Recommended for:
 - Suckling foals that need additional nutrients
 - Horses that are weaned early (less than 4 months old)
 - Young weanlings in cold weather (e.g., those bred for the Southern Hemisphere)
 - Undernourished, young growing horses

FEEDING RECOMMENDATIONS:

In general, feed ½ to 1 lb per 100 lb body weight per day. As a rule of good feeding practices, McCauley's **FOAL & WEANLING** should be introduced gradually.

The following amounts are for an average size riding horse type, such as Quarter Horses, Standardbreds and Thoroughbreds (1100 to 1300 pounds mature body weight). The actual amount should be adjusted according to the body weight of the horse and expected growth rates.

- With suckling foals, allow 1 lb per head per day per month of age. Actual feeding levels will vary with the milk supply available from the mare.
- In creep feeding, feed only what will be consumed in one day. Any left over feed should be discarded and the amount of feed allotted should be reduced accordingly.
- With weanlings, feed 1 lb per head per day per month of age.

In addition:

- The quality of the pasture/hay for these very young horses is particularly important. They should have available the best quality forage.
- Always provide clean, fresh water and salt. Do not feed additional proteins, vitamins or minerals except on the advice of a nutritionist.
- Consult your veterinarian concerning proper health programs and always maintain a good worm control program.
