FUNCTIONS AND BENEFITS OF McCAULEY'S OMEGA BRAN:

- McCauley's Omega Bran is **fully fortified and nutritionally balanced**. Omega Bran can replace the grain source without sacrificing vitamin/mineral balance.
- **Calorie dense.**
 - Adds calories to the diet with less bulk.
 - Excellent for improving body condition and adding sheen to the hair coat.
- **High in omega-3 fatty acids** for maximum health.
- Safe for **all ages and breeds** of horses.
- **Safe alternative source of calories** for horses suffering from nutritionally challenging conditions (e.g.: colic, COPD (heaves), Equine Polysaccharide Storage Myopathy, HYPP, etc.).
- Recommended for:
 - performance horses, such as endurance horses, 3-day eventers, racehorses, etc.,
 - conditioning horses for sale or show,
 - nutritionally challenged horses (see above),
 - improving body condition or hair coat.

FEEDING RECOMMENDATIONS:

McCauley's Omega Bran can be fed alone or mixed with feed. The pellet (mini-pellet) form allows for easy feeding and mixing. As a general rule of good feeding practices, McCauley's Omega Bran should be introduced slowly. The following recommendations are for an average size riding horse (1000 to 1200 lbs.). The actual feeding amounts should be adjusted according to the body weight of the horse.

- One pound of Omega Bran can replace 1.5 to 2 pounds of a typical feed without sacrificing
 - vitamin levels or upsetting mineral balances.
- To improve hair coat condition or for general maintenance, feed 0.25 to 0.5 pounds per day.
- Adding 1 to 2 pounds of Omega Bran to the diet will provide significant weight gain.

FEEDING RECOMMENDATIONS continued:

- For nutritionally challenged horses, Omega Bran can serve as the sole grain source. (Please consult McCauley Bros.' nutritionists.)
- For additional calories with even less bulk, McCauley's Rice Bran Oil is recommended in place of Omega Bran.
